

Adding your own subjects on Education Perfect

When you [log in](#) to Education Perfect, you'll arrive at your Student Zone. From here you will be able to see your classes. *You also have the option of selecting other subjects you are interested in, so you do independent, self directed learning.*

To change which subjects you have pinned, click *Add or remove subjects*.

If you click on one of your subjects you will be able to see any task or assessments you have been assigned for that subject, as well as any recommended lessons. **If there are no set tasks or lessons, you can browse through all the available content (click *Browse all content*) and choose any lessons you are interested in, or areas you want further practice in.**
